

Why Consider Vapor Technology?

FAST - EFFECTIVE – THOROUGH

Few people enjoy cleaning, but like eating or bathing, it is considered necessary for good health and social survival. Now with Vapor Technology, you not only save time, but also deep clean as you surface clean. It takes less effort and less time to do the job right the first time. The visibly superior result speaks for itself.

3-WAY ACTION, ONE PROCESS

With Vapor Technology you clean, sanitize and deodorize all at the same time and leave no chemical residue that may effect food or be detrimental to the surface you are cleaning. The hot vapor penetrates the pores of the materials cleaned and destroys mould spores, bacteria, viruses and germs of all kinds. This proven process is the single most effective method of sanitizing known to man.

100% ENVIRONMENTALLY SAFE

Using only tap water heated to a temperature in excess of 250° F (120° C), Vapor Technology does not use any chemicals, suspect solvents, cancer causing chlorines, germicides, pesticides or herbicides to get the job done. Therefore, it is safer and simple to use and does not introduce toxic substances into our homes and bodies. Detrimental effects of long-term exposure to many household cleaning chemicals and their associated waste are only now beginning to be understood. Only a vapor system eliminates this harmful potential. Why take chances with your most precious asset - your health.

THE #1 GERM KILLER IN THE WORLD

Heat, in the form of vapor, has long been used in the medical environment (hospitals, dentists, etc.) to disinfect surgical instruments and equipment. *Did you know that disinfectants such as bleaches are only effective if the surface to which they are applied is free of organic compounds (or in other words, already clean)? That the effectiveness of disinfectants is measured in terms of germ reduction based on exposure to temperature?* Vapor Technology makes it safe, simple, and very cost effective to clean and control germs.

REDUCES ALLERGIES AND RESPIRATORY AILMENTS

We are continually exposed to germs, viruses, and the residue from millions of very small creatures called *dust mites*. These tiny organisms live everywhere we do; our clothes, bedding, carpets and upholstery. Research has shown that the excrement from these tiny creatures plays a major role in many respiratory problems and indoor air pollution. The only way to effectively combat their presence is through the very high temperature of dry vapor. This is the only known way to destroy them! Vapor Technology is uniquely beneficial for those who suffer from such a situation.

CHEMICALLY FREE WAY TO CLEAN & DISINFECT

Americans spend OVER 7 BILLION DOLLARS per year are spent on household cleaners that are ultimately washed down the drain to contaminate our food chain and precious, limited, fresh water supplies. Vapor Technology uses only a very small amount of water to produce thousands of gallons of nature's best cleaning solvent - dry vapor. This can dramatically reduce waste and water consumption. **BEST OF ALL IT SAVES US FROM POURING OUR HARD EARNED DOLLARS DOWN THE DRAIN.** NOTE: Vapor is different from steam in 3 very important ways: Vapor has a low humidity index of only 5% compared to steam at over 18% or more (that is why vapor is often referred to as 'dry'); vapour is closer to a gaseous state while steam is closer to a liquid state; and vapor can achieve much hotter temperatures than steam.

Vapor Technology

The healthy, safe, smart way to clean & save money!

(203) 371-5040

Mondial Vap 2000

Power Supply: 110V
Max. Power: 1500 W
Boiler Capacity: 4.5 L (Refill)
Max. Pressure: 60 PSI
Pressure Regulator: Yes
Temperature: 120 C / 250 F
Monoblock Stainless Steel Boiler: Yes
Use: Semi-Commercial / Heavy Residential
\$2395

Vaporetto 1030

Power Supply: 110 V
Max. Power: 1500 W
Boiler Capacity: 1.5 litres (Refill)
Max. Pressure: 45 psi
Temperature: 120 C / 250 F
Pressure Regulator: Yes
Monoblock Stainless Steel Boiler: No
Use: Light Residential
\$795

Eco Pro 3000

Power Supply: 110 V
Max. Power: 1500 W
Boiler Capacity: 2.5 L (Refill)
Max. Pressure: 52.5 psi
Pressure Regulator: Yes
Temperature: 120 C / 250 F
Monoblock Stainless Steel Boiler: Yes
Use: Residential
\$1495

Vapor Technology.
*The healthy, safe,
smart way
to clean & save money!*
Just add water!
(Never use a chemical again!!!)

(NOTE: Prices do not include tax and shipping).

*LivWell Solutions is an authorized
distributor and Service Centre for
Polti and Vapore vapor technology.*
